

JOSH MIRAMANT

DEVELOPER AND PROBLEM SOLVER

I'm a passionate front-end developer who loves startups, problem solving and creating beautiful web-apps. JavaScript is my jam...but I'm comfortable with RoR and backend work, as needed.

+ EMPLOYMENT

- 2015- **BLUE ORANGE DIGITAL** JS Developer/Founder
A big data visualization software development agency. Developed robust applications for startup and mid-sized organizations. I lead architecture and development of JS applications implementing dashboards, custom D3 data visuals and internal custom API integrations. Worked in React, Angular and Backbone with Node.JS, Python and Rails backends.
- 2015-2016 **INSIGHT SIGNALS** Sr. JavaScript Developer
Lead frontend architect and developer for a Backbone. Marionette application. Integrated with RESTful API. Tools include Require.JS, Grunt, Webpack, SASS, Coffeescript, custom Node authentication, Firebase, Datatables.
- 2013 - 2015 **GOODCO, INC.** Lead JavaScript Developer
Working with a team of >10 engineers, lead JS development for robust Backbone and Angular apps. Also contributed to feature development on RoR web application. Developed mobile-hybrid application with custom iOS and Android wrappers. Worked with design team to implement award-winning UI including robust D3 solutions. Written with SASS, Coffeescript, Require.JS, Backbone.Marrionette, Angular 1.*, Grunt, RESTful RoR custom API and Bower.
- 2013-2014 **DEV BOOTCAMP** Coding Teaching Assistant
Assisting teachers in educating beginner web developers through a code immersion bootcamp. I focus on teaching Ruby, algorithms, web-fundamentals, Sinatra, technical design principals, RoR and RSpec. Conduct in-depth code reviews both in-person and remote. Helped organize >100 person Hackathons. Additional duties included pair program sessions and daily code lectures.
- 2010 - 2013 **EVERFI, INC.** Marketing Engineer
Joining as the first employee at this education technology startup, I helped grow this SaaS company through \$22 million in funding and an acquisition. Responsibilities included: Front-End Web Development practicing Data Driven Design. Maintaining Refinery, a Ruby on Rails CMS, for corporate website, including content, analytics, and microsite design. Scaling CRM platform on Salesforce.com from 10 - 60 people.
